

A silver metal spiral binding is visible on the left side of the notebook cover, consisting of a series of loops that hold the pages together.

Cambiaresta *Winter Footwear*

Catalogue

Cambiaresta, Lda

We are producers of sheep/lambskin footwear.

Our production begins with the choice of the lambskins, in its raw state. All the tanning and dyeing process is made in our factory, according to the final product, taking in consideration the demands from our costumers.

All our models are made of twin-face genuine lambskin, to make the slippers softer and warmer.

We have special care with the choice of the products and materials used on the manufacturing of our slippers.

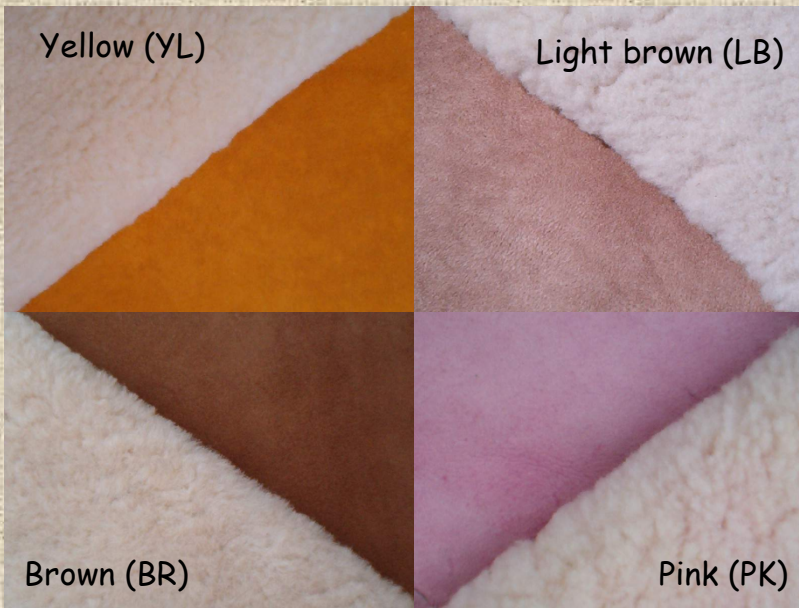

Our products are hand and machine washable (with appropriate program and products).

As we take very seriously the comfort of babies we developed a collection thinking of their wellbeing.

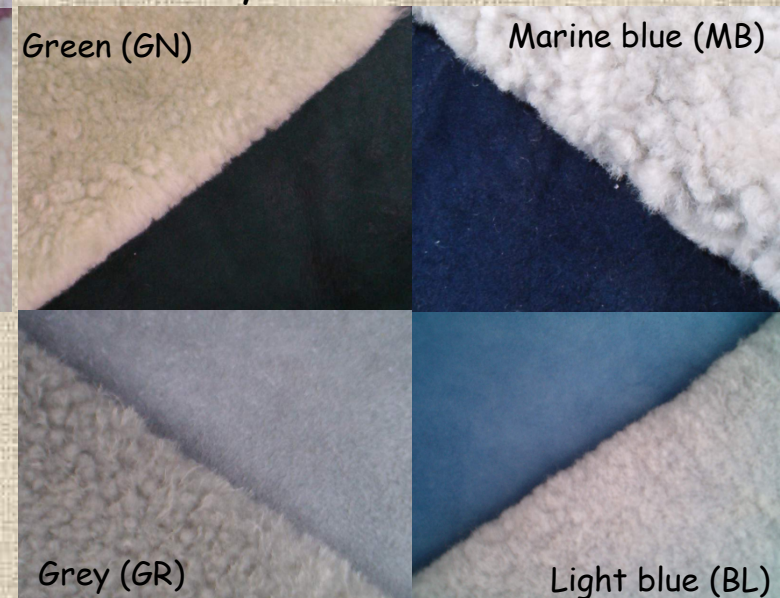

Take a look on our collection.

We hope you like it.

Our Colours

All our models are made in twin face lambskin, with soft suede finishing. Except for the Grey colour, the wool is not tanned. However the colour used on the skin gives the wool its own tonality.

All our models are available in these colour
(other available colors)
(Ask for a Colour Chart)

Vegetal Tanning

Because we care about the blue planet, we also work to make it a better place to live in. We are aware that not all the products used on the tannery industry are totally harmless to the environment.

That is why we ask and expect from our suppliers the best products to assure the best quality for our clients and no harm done to the planet.

Vegetal tanning is a process that allows the materials to integrate the environment as quick as possible with no harm done. The products used on the tanning process are 100% vegetal. The synthetic materials used to manufacture the shoes are reduced to the minimum: the sole is sewed, there is no glue or any artificial products.

You can find all our models in vegetal tanning, in white, light brown and brown.

With vegetal cow hide suede sole or EVA sewed sole.

** Prices under consultation*

The Soles

For our indoor shoes collection we use comfortable materials for soles: sheepskin (L), cowhide leather - suede (S), synthetic (EVA rubber sole with 6mm high) - microporous (M), EVA rubber sole with 2cm high - Cunha (C) and EVA rubber sewed sole (SC). For the high boots - out door boots - we use a special Eva rubber sole, as light as hard, to make them more resistant to any weather conditions.
